

2 Water Quality Monitoring Team

Jersey Water has long realised the importance of water quality monitoring as a useful tool in the production of good clean water for supply. To this end the Company has a modern laboratory situated at the Millbrook Depot, St Lawrence.

The Laboratory Manager, David Mayman, has been employed by the Company for over 25 years and is a Chartered Chemist and member of the Royal Society of Chemistry. Sarah Gavey is the assistant manager and has been with the Company for over 16 years and the laboratory technician is Nora Treanor, who has a wealth of experience from her previous roles in agriculture, the dairy and other laboratories.

The three samplers of the department, Keith Quemard, Bob Langford and Matthew Parkin have continued to provide an excellent service to the laboratory and when attending consumer queries.
